Fron End Developer

Description

Qualified candidates must be experienced in front-end development and visual design. The ideal candidate must have a strong knowledge of HTML5, Angular, React, Bootstrap, Materialize, CSS3, SASS/LESS and JavaScript development experience. Additionally, this individual must be able to collaborate with various departments and be comfortable working in a fast-paced, product-centric environment.

Responsibilities

RESPONSIBILITIES

- Primarily focus on developing responsive HTML5 and CSS3 scalable products
- Convert UX designs and comps into HTML5, CSS3 and JavaScript based experiences
- Ability to brand UX designs into visual designs on Sketch, XD, PhotoShop, Illustrator, etc.
- Build reusable, scalable code and libraries for future use
- Experience creating CSS3 libraries in SASS or LESS
- Create client quality mockups and prototypes
- Ensure the technical feasibility of UX/UI designs
- Create responsive cascading style sheets (CSS3) that are scalable across all browsers, devices and platforms
- Collaborate with the product team, and key stakeholders, in order to think through and inform design decisions
- Optimize applications for maximum speed and scalability
- Maintain pixel perfect graphics and branding throughout the product's interface
- Write functional requirement documents and guides
- Manage commitments across multiple projects

San Juan, PR, USA

Date posted

October 13, 2021

Valid through

28.02.2022

- 3-5 years front end web development & visual design experience
- Bachelor's degree in graphic design, web development or related field
- Proficient understanding of web markup, including HTML5 and CSS3
- Basic understanding of server-side CSS pre-processing platforms, such as LESS and SASS
- Proficient understanding of client-side scripting and JavaScript frameworks, including jQuery
- Familiarity with advanced JavaScript libraries and frameworks, such as Angular, React and/or Bootstrap
- Good understanding of asynchronous request handling, partial page updates, and AJAX
- Basic knowledge of image authoring tools, to be able to crop, resize, or perform small adjustments on an image. Familiarity with tools such as Gimp or Photoshop is a plus
- Proficient understanding of cross-browser compatibility issues and ways to work around them
- Good understanding of SEO principles and how they are handled on the front end
- Willingness to communicate project exceptions (e.g. slipping schedules) to project manager
- Clear and effective written, verbal, and listening skills.
